2013

Jobs - 826

Payroll - \$25 Million

Business Revenues - \$129 Million

2020

Jobs - 1,072

Payroll - \$52 Million

Business Revenues - \$161 Million

CDOT's Division of Aeronautics has completed an economic impact study for Colorado Airports. The study revealed the Northern Colorado Regional Airport provides an annual economic impact of \$161 million for the economy. Study highlights indicate the airport supports 1,072 area jobs providing \$52 million in payroll and \$83 million in total value added. These numbers compared to the 2013 study show a consistent trend in the addition of higher quality jobs and greater economic impact as a result of Airport activities.

These measurements stem from all economic activities that benefit from airport activity; including payroll, employment, tourism, capital spending, taxes, recirculation of spending, and output from other sectors of the economy. The Airport's Economic Impact Summary is available on the airport's website at: www.flynoco.com
